P. falciparum. Sequencing of the Plasmodium chromosome 2 and the champers in healf of the Plasmodium chromosome 2 and the champers in healf of plasmodic broaders has present by the plasmodia process has present for the plasmodia plasmodium and drug development. Parasite resistance to drugs and mosquito parts of the world, and then healf to a resurgence of malaria in many parts of the world, and then it as pressing need for various and new drugs. annibodies against it, detecting in the grantitating a polypeptide in tissue, as molecular weight markers and as co-grantitating a polypeptide in tissue, as molecular weight markers and as co-granting applement. (II) and its hunding partners are useful in medical co-language fronter expression at biological activity. The probability is probable for the partners are useful activity. The probability is polypeptide, and polymentation applications in co-granting forensics, gone mapping, identification of mutations of diagnostics, forensics, gone mapping, identification of mutations or approaches, for approaches of conducts reproduct to mutations of and to produce other types of data and products dependent on ENA and companies to appear to types of data and products dependent on ENA and companies of the invention.

CC diagnostic coding requences of the invention.

CC specification, but was obtained in electronic format directly from Wife at tip, wipo in Apit/published per sequences.

These can be used in the treatment of hearth, lemane system, and the productive graticiness in the promoter. In the presentation of proteins are promoted to the production of proteins are promoted to the production of proteins are promoted to the production.
